### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Julie Seaman on 9-27-05.

The application has been amended as follows:

Amend Claim 12 as follows:

12. A process for preparing a toner for electrostatic latent image development, which comprises: mixing a resin minute particle dispersion, a colorant dispersion and a release agent dispersion, and aggregating the resin minute particles, the colorant particles and the release agent particles to form aggregated particles; and heating the aggregated particles to a temperature not lower than a glass transition temperature of the resin minute particles to fuse and coalesce the particles; combining the coalesced particles with external additives; wherein a variation in a number average particle diameter of the coloring particles is 25 or less, an average circularity of the coloring particles is 0.975 or more, and a variation in a circularity of the coloring particles is 2.5 or less; and wherein as the external additive, at least monodisperse spherical particle having a true specific gravity in a range of 1.0 to 1.9 are used, and a ratio of a number average particle diameter  $D_{TN}$  of the coloring particles and a number average particle

diameter  $D_{add}$  of the monodisperse spherical particles ( $D_{TN} / D_{add}$ ) is in a range of  $25 \leq D_{TN} / D_{add} \leq 80$ .

2. The following is an examiner's statement of reasons for allowance: as now amended, including rejoined and amended by the Examiner claim 12, the prior art of record does not teach or suggest the toner having external additives with the specific requirements of variation in a number average particle diameter, variation in circularity, specific gravity, and ratio of number average particle diameter to coloring particles and external additive.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark A. Chapman whose telephone number is 571-272-1381. The examiner can normally be reached on Monday - Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Huff can be reached on 571-272-1385. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
